Warsaw, 9 March 2012

NFI Midas signs contract with Polkomtel

Mobyland, a subsidiary of NFI Midas, listed on the Warsaw Stock Exchange, and Polkomtel have signed a contract to provide telecom services. The contract sets forth the terms and conditions whereby customers of the telecom operator Plus will have ultrafast Internet access in LTE technology.

The signed contract concludes the stage of negotiations on the terms and conditions for the NFI Midas Group to provide ultrafast mobile Internet service for Polkomtel in LTE technology. The size of data transmissions by the NFI Midas subsidiary for Polkomtel will be specified in orders placed by the Plus operator under a wholesale agreement. In its first order, Polkomtel has expressed a demand for 11 million GB for a total price of PLN 101.7 million net.

The signing of the contract to provide telecom services to Polkomtel is another step in the expansion of ultrafast Internet in Poland. On the basis of the unique HSPA+/LTE technology and the radio frequencies held by its subsidiaries, the Midas Group is the only one in Poland able to offer access to ultrafast 4G telecom services. Internet in LTE technology is already available in over 22,000 localities in Poland.

Plus is the second company that has decided to introduce the ultrafast Internet service offered by NFI Midas. Thanks to the infrastructure of Midas Group companies, Cyfrowy Polsat began to offer a similar service in September 2011. Towards the end of January, NFI Midas received a further order from Cyfrowy Polsat for a packet of 13 million GB of data.
