

Press release

Warsaw, 28 December 2012

Polkomtel has placed another order for data transmission services with Mobyland from the Midas Group

Mobyland, a telecommunications company from the NFI Midas Group, has accepted an order for data transmission services from Polkomtel. The net value of the order for transmitting 22 million GB of data is PLN 145,305,600.

“This is the second order for data transmission we’ve received from the Plus network operator. The first was for 11 million GB,” says Krzysztof Adaszewski, President of the Management Board of NFI Midas. Mobyland provides services to Polkomtel on the basis of a 5-year agreement concluded in March 2012. The value of the agreement is defined on the basis of separate orders.

Pursuant to the agreement, Mobyland will provide access to a wireless data transmission service rendered in the 1800 and 900 MHz bands in LTE or HSPA+ technology. For this purpose, a network will be used which is based on frequencies of the Midas Group and the Group entities Centernet and Aero2.

Mobyland and Polkomtel agreed that, given the early submission of the order by the Plus network operator, the price per megabyte transmitted under the order would be PLN 0.00645 net, i.e. lower than that accepted in the first order (PLN 0.00925/MB). Settlement of the new order and the as yet unpaid part of the previous order will be made according to the schedule agreed:

- the net amount of PLN 16,952,320 will be paid in two equal instalments in November and December 2012,
- the net amount of PLN 113,590,245.59 will be paid in 23 equal monthly instalments due from January 2013 to November 2014,
- the net amount of PLN 23,693,742.12 constituting a one-off final payment for the order will be paid in December 2014.

The total value of both orders by Polkomtel is PLN 222,045,587.

**About the company:**

NFI Midas S.A., listed on the Warsaw Stock Exchange since 1997, heads a Polish telecommunications group controlled by Zygmunt Solorz-Żak. The NFI Midas S.A. Capital Group comprises CenterNet S.A., Mobyland Sp. z o.o. and Aero 2 Sp. z o.o., which was acquired in December 2011. The Group's core business is the creation of a nationwide telecommunications network in HSPA+ and LTE technologies, so that it may engage in the wholesale of Internet access to retail operators with large customer bases.
